RADIO FIRE ALARM MONITORING NETWORK

Amendment #2

The following changes / clarifications / additions have been added for the above captioned Project, dated May 12, 2017, as follows. All provisions of the original Drawings and Specifications shall remain in force, except as specifically modified or changed herein, or by other Addenda.

- 1. QUESTION:** Is the radio receiving equipment (head end) being relocated to DuComm's current location or is it being relocated to their new location on the DuPage County complex? The new pricing requirements will require contractors to view the new locations for the antennas and design the network connectivity to meet the new requirements.

ANSWER: The new DuComm facility (because it is co-locating with Dupage Homeland Security) is 418 North County Farm Road. The work to be completed will be occurring at the Wheaton Police Department (900 West Liberty) and the new DuComm facility. The details of the final work associated with our equipment move will not be determined until the new DuComm facility is near completion. At this time, we would be amenable to a contractor providing an "estimate" for re-locating the receiving equipment currently located at Wheaton Fire Station #38 (1 Fapp Circle) to DU-COMM. As a deviation, contractor may opt to not submit a price for relocating equipment with an explanation for not providing a cost at this time.
