

**RESOLUTION R-2022-32**

**A RESOLUTION SUPPORTING THE NECESSITY AND BENEFITS OF PROJECTS SUBMITTED BY THE CITY OF WHEATON FOR COMMUNITY PROJECT FUNDING**

**WHEREAS**, the United States authorized the renewal of the Community Project Funding program in bill H.R.2471 for 2023; and

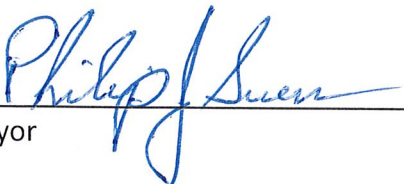

**WHEREAS**, the City of Wheaton is eligible to submit projects for consideration in the Community Project Funding program to the congressional office of the Illinois 6<sup>th</sup> District; and

**WHEREAS**, these projects, if funded, would provide a variety of benefits to residents of the Illinois 6<sup>th</sup> Congressional District and City of Wheaton.

**NOW, THEREFORE, BE IT RESOLVED** that the Mayor and the City Council of the City of Wheaton, DuPage County, Illinois, support the City of Wheaton's requests for Community Project Funding for the following projects:

- (1) **Roosevelt Road Water Main Replacement:** This project would replace a segment of aging water main, between President Street and the eastern city limits of Wheaton, that is prone to main breaks and service disruptions.
- (2) **Elm and Blanchard Lift Station Removal:** This project would remove one of Wheaton's wastewater lift stations. The lift station would be replaced with a gravity sewer main that improves energy efficiency, increase system capacity, reduce maintenance costs, and reduce sanitary sewer backups and overflows.
- (3) **Roosevelt Road Pedestrian Bridge:** This project would install a pedestrian bridge at easternmost intersection of Winfield Creek and Roosevelt Road to improve safety and improve pedestrian access along this corridor to commercial areas of the City.
- (4) **Wheaton Library West Plaza Replacement:** This project would replace the library's west plaza, addressing current repair needs and expanding it to provide a flexible event area. This renovation would allow the library to facilitate a greater number of community events as well as increase resident engagement with the library.
- (5) **Concrete Street Replacement:** This project would replace a portion of the City's aging segments of concrete road at various locations that are now exhibiting prolific cracking. Replacement would revitalize these sections of road and improve traffic conditions.

**ADOPTED** this 18<sup>th</sup> day of April 2022
