DESIGN SPECIFICATIONS

GENERAL STANDARDS

1. All Portland Cement Concrete shall conform to Illinois Department of Transportation Class SI mix.
2. Where new concrete work meets or abuts any existing concrete structures, the existing concrete shall be saw cut to a straight and clean edge and expansion material placed between the new and existing work.
3. Expansion material is also required between new curb and new concrete driveways; new sidewalk and new concrete driveways; and new curb and new sidewalk.
4. A culvert will be required where the street does not have curb and gutter.
5. Replacement of barrier curb and gutter with depressed curb and gutter to be with a single pour. Gutter shall be a minimum of 8" thick.
6. Wire mesh is not required.
7. Pea gravel is not allowed as fill or base material.
8. All curb replacements shall be a minimum of 5' in length.

RESIDENTIAL DRIVEWAYS

1. Shall be 5" thick, Portland Cement Concrete, Class SI
2. 1 1/2" Bituminous Concrete, Class I-11 on an 8" thick aggregate base

COMMERCIAL DRIVEWAYS

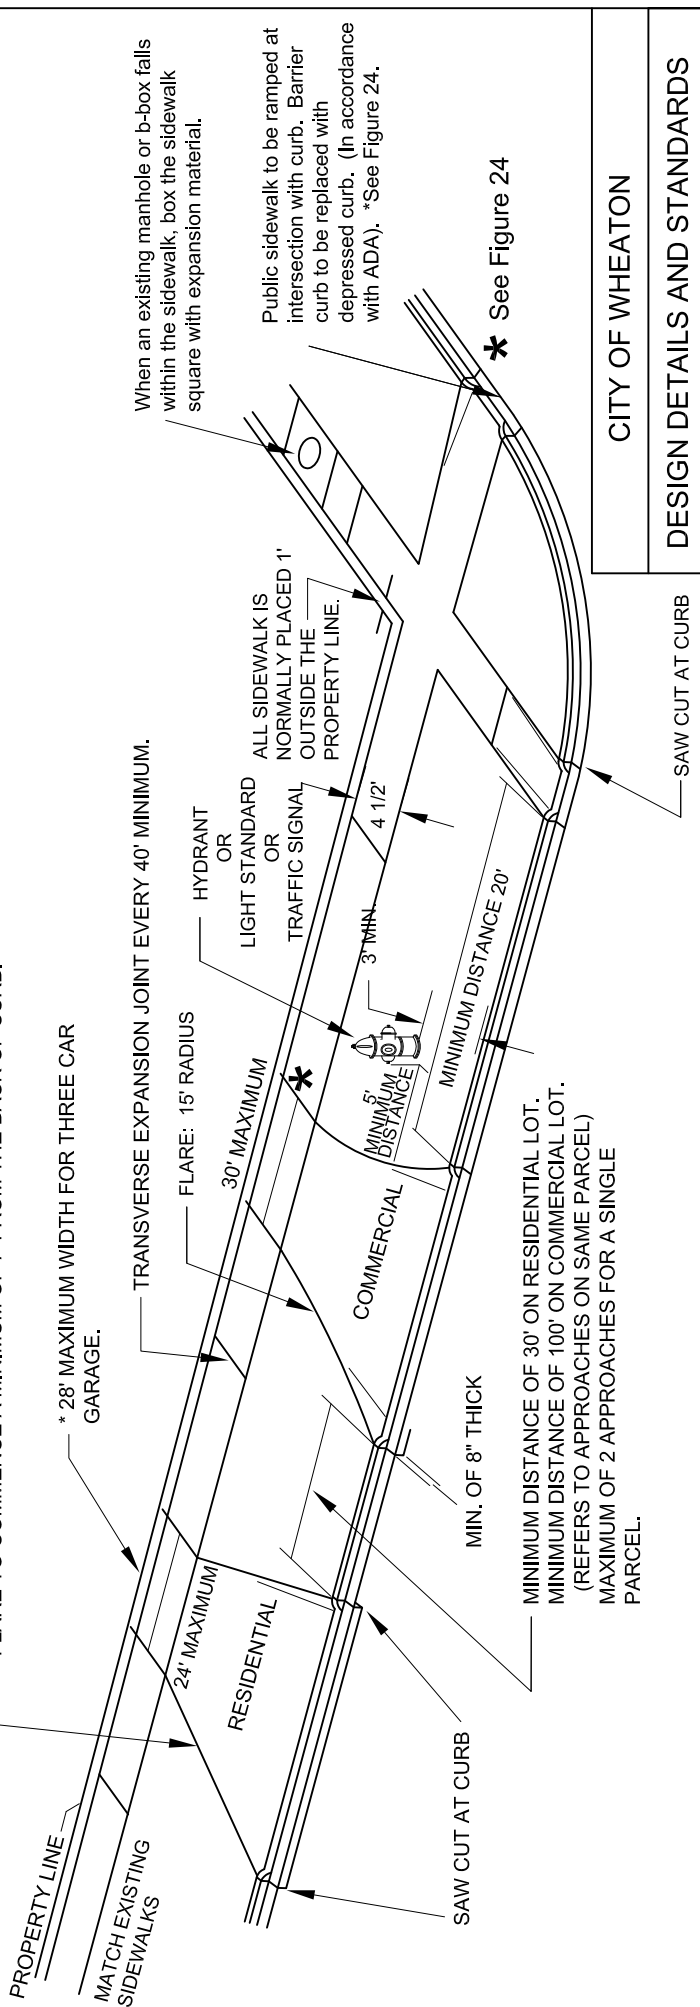

1. 6" thick, Portland Cement Concrete, Class SI (Bituminous is not permitted)

SIDEWALK

1. 4" thick, Portland Cement Concrete on a compacted crushed aggregate or bank run gravel base.
2. 5" thick through Residential Driveways
3. 6" thick through Commercial Driveways
4. Walk shall be no lower than the centerline of the street.
5. The sidewalk shall have scored transverse joints at equal spacing not to exceed five (5) feet or less than four (4) feet.
6. The maximum gradient of a sidewalk shall not exceed ten (10) percent.

FLARE: 3' ON MINOR STREETS; 6' ON ARTERIAL AND COLLECTOR STREETS. FLARE TO COMMENCE A MINIMUM OF 7' FROM THE BACK OF CURB.
